

Learning Activity 15-II-1

Identify Code Violations and Unsafe Behaviors Involving Hazardous Materials

Name _____ Date _____

References

Fire Inspection and Code Enforcement, 7th Edition, pp. 657-673
NFPA® 1031, 5.3.9

Introduction

Recognizing properties and identifying containers and marking methods of hazardous materials are essential skills that an inspector must possess. These skills help an inspector to be aware of unsafe conditions and behaviors involving hazardous materials. Unsafe conditions, including those resulting from the lack of proper fire-protection systems or incorrect construction types, can be corrected by applying and enforcing the appropriate building or fire code requirement or referring the condition to the proper authorities.

Directions

Study the pictures shown below. On the lines below the pictures, list any deficiencies. If there are no deficiencies shown, simply write "none."

Activity

1. _____

2. _____

3. _____
